FASTPREP BEAD BEATING LYSING MATRIX

FASTPREP INSTRUMENTS

A complete range of cell lysis and tissue grinding solutions to suit your sample preparation needs.

A gold standard for a large variety of Life Science applications validated with + 5,000 publications

MP Bio developed a wide variety of specialized Lysing Matrix tubes to guarantee a thorough homogenization and cell lysis of any sample.

- **Optimal cell disruption of any sample:** the size of the beads and their composition optimized according to the sample
- **A solution for any application:** 16 matrix compositions available in 2 mL, 4.5 mL, 15 mL, 50 mL tubes or 96-well plates
- **High reproducibility:** lysing Matrix tubes contain highly controlled size and quantity of lysing matrix particles and are certified DNase & RNase free
- **No cross contamination:** single-use closed Lysing Matrix tubes

Most advanced lysis, homogenization and grinding system applicable for genomics, proteomics, or other chemical studies and analysis.

- **Powerful:** thorough grinding and lysis in just a few seconds.
- **Highest Yield and Purity:** the most DNA, RNA and proteins from any sample type.
- **Complete Solution:** largest number of Lysing Matrix compositions and kits for DNA, RNA and protein purification.
- **Consistent Results:** precise setting of time and speed

ADAPTERS

Why choose MP Bio's FastPrep® adapters?

- Durable construction
- Perfectly secured tubes
- Easy installation and removal
- Fit your needs

TeenPrep Tube Holder

CoolPrep Tube Holder

Adapters for the FastPrep® System are flexible and interchangeable, allowing for volumes ranging from 2 mL to 250 mL bottles and 96-deep well plates. They are built for durability and available for ambient or cryogenic bead beating. And of course, autoclavable metal adapters for experiments performed with infectious samples.

Fast, Easy & Highly Reproducible

FastPrep Kits offer optimized methods for the extraction of DNA and RNA ready to use for any downstream application.

- Rapid and reproducible sample lysis and purification process.
- No cross-contamination with closed lysing matrix tubes.
- Increased yields of high-quality DNA and RNA.
- Integrity and size of DNA and RNA are retained.
- Ready-to-use DNA & RNA, complete removal of contaminants and inhibitors.

COVID ESSENTIALS

To help fighting the SARS-CoV-2 virus, MP Bio put together a comprehensive portfolio of essential products for research, diagnostic and manufacturing.

MP Biomedicals is stepping in to support scientists worldwide in understanding SARS-CoV-2 and discovering solutions to combat the disease. We offer monoclonal antibodies from mouse with high affinity to the SARS-CoV-2 spike proteins for use in various applications, including western blot, immunoprecipitation, ELISA tests, rapid tests and flow cytometry.

VIRAL RNA EXTRACTION INSTRUMENTS AND KITS

Fast and sensitive automated viral RNA extraction for SARS-CoV-2 detection

The MPure-12 automated nucleic acid extraction platform together with two dedicated kits is designed for medium throughput extraction of viral RNA from swabs and other specimens in less than one hour.

- Fully automated and integrated platform that offers cost and time savings
- Highest quality and yields of viral RNA for downstream applications
- Reproducibility, lot-to-lot consistency, ease-of-use and convenience

RAPID 2019-nCoV IGG/IGM COMBO TEST

Easy to use - Only 3 steps

- **RAPID AND CONVENIENT:** Results in 10 minutes. Requires no instruments.
- **OPTIMIZED DETECTION:** Can detect specific antibodies to both N and S virus proteins for improved serological detection rates.
- **SPECIMENS:** Easy sampling, only 2µl of Serum, Plasma or Whole Blood is needed.
- **PERFORMANCE CHARACTERISTICS:** 97.06% Specificity, 94.74% Sensitivity, 95.87% Accuracy.
- **STORAGE:** Room temperature, 18 months shelf life.
- **CE-IVD CERTIFIED:** For professional use.

GEL TRANSFER

Reproducible Transfer in less than one hour with the utmost efficiency

Today's molecular biologists demand fast results and publication quality data. The Vacuum Blotter is built to fulfil these requirements by quickly and efficiently transferring DNA and RNA onto suitable membrane such as Positive nylon membrane.

- **Reproducibility:** provided vacuum pressure is precise and stable during blotting procedure
- **Speed up your transfers :** In less than one hour instead of overnight with standard capillary transfer.
- **Instant unit assembly:** by means of catches instead of screws.
- **Extremely compact** with very large transfer area (28 x 28 cm)
